

# SLEEK, SUSTAINABLE & SUBSTANCE-FREE

**Neil Kelly Cabinets offer an attractive alternative to standard cabinetry.**

**By Robert Knoll**

**D**rawing on decades of cabinetmaking experience, Neil Kelly Cabinets was first in the United States to introduce a green cabinet collection, featuring “no added formaldehyde” agri-board panels, binders, glues, FSC-certified wood veneers and low VOC glues/adhesives and finishes. Neil Kelly cabinets offer exceptional craftsmanship and style, inspired by national award-winning kitchen and bath designers. Neil Kelly offers a healthy alternative in custom cabinetry. Their cabinets already exceed California’s stringent new 2009 indoor air quality standards, reducing formaldehyde emissions.

This Oregon family mountain home was rebuilt using sustainable methods and materials. The kitchen and bath both feature Neil Kelly cabinets, made from “no added formaldehyde” agri-board, as well as FSC-certified alder solids and veneers. Low VOC glues, adhesives and finishes promote optimum indoor air quality.

The Portland, Oregon-based manufacturer offers its environmentally friendly cabinets through a national dealer network in key U.S. markets. Neil Kelly cabinet information is available at [www.neilkellycabinets.com](http://www.neilkellycabinets.com) or at 503-335-9207.
